

# Active Directory (AD) Groups

- Groups are used to collect user accounts, computer accounts, and other groups into manageable units.
- Working with groups instead of with individual users helps simplify network maintenance and administration.
- There are two types of groups in Active Directory:
  - **Distribution groups:** Used to create email distribution lists (Microsoft Exchange Server).
  - **Security groups:** Used to assign permissions to shared resources.

New Object - Group

Create in: alnet.local/

Group name:

Group name (pre-Windows 2000):

Group scope

☐ Domain local

☒ Global

☐ Universal

Group type

☒ Security

☐ Distribution
